PROFESSIONAL SUMMARY

Electrical engineer passionate about consumer electronics design and manufacturing, with hands-on experience bringing ideas from concept to hardware. Strong focus on creativity through personal projects, robotics, and active community involvement, with a drive to build impactful, user-centered technology.

EXPERIENCE

Test & Automation Engineer, Schneider Electric

July 2024 – Present

- Led development & integration of new manufacturing test equipment from India.
- Coordinated network infrastructure renovations and established cybersecurity standards.
- Facilitated Smart Factory certification by implementing robotic process automation, AVEVA AI analytics, smart torque drivers, vision systems, and E-ink tags.
- Reduced high-risk manufacturing failure modes by over 75% for two consecutive years.

Graduate Researcher, Michigan Technological University

April 2023 – April 2024

- Led development of robust autonomous surface vessels for the US Army and Navy.
- Established metrics quantifying degradation of LIDAR sensor data, published by SPIE.
- Trained multi-modal neural networks utilizing human feedback and data augmentation.

Laboratory Instructor, Michigan Technological University

Sept 2021 – Dec 2023

- Authored schematics and procedure manuals for undergraduate Circuits II & C/C++.
- Instructed creation & debugging of circuits using oscilloscopes and function generators.

Engineering Intern, Skilled Manufacturing Inc.

June 2018 – June 2019

- Designed line fixtures and improved processes providing over \$17,000 in savings.
- Created work instructions to improve the de-burring process and reduce cycle time.

EDUCATION

MS, Electrical & Computer Engineering

April, 2024

Michigan Technological University

BS, Electrical Engineering, Minor in Mathematical Sciences

April, 2023

Michigan Technological University

SKILLS

PCB Layout & Design, Schematic Capture, High-Speed Interfaces (USB, SPI, I2C, UART, eDP), Hardware Validation/Debugging, AR/VR Hardware, Linux, International Electronics Manufacturing, SMD Soldering, Root Cause Analysis, Process Automation, Python, C/C++

ACCOMPLISHMENTS & VOLUNTEER WORK

- Open Sauce, Science & Technology Convention – Exhibitor June 2024, July 2025
- Full MS Research Scholarship Recipient April 2023
- Habitat for Humanity July 2025
